DETAILED ACTION

Claims Allowed

1. The following is an examiner's statement of reasons for allowance:

A method of removing sulfur from a liquid hydrocarbon feed comprising the steps of: (a) dissolving metallic sodium in a solvent to form a solution; (b) combining said solution with a liquid hydrocarbon feed to form a first combined stream, said liquid hydrocarbon feed having a portion comprising at least one organosulfur species, and said step of combining occurring at a first desired temperature and at a first desired pressure, said first desired pressure being above the vapor pressure of said solvent at said first desired temperature; (c) lowering the pressure of said first combined stream sufficiently to achieve vaporization of a substantial amount of said solvent from said first combined stream to produce a second composition; (d) combining said second composition with a hydrogen donor to form a third composition; (e) reacting said third composition for a sufficient time and at a sufficient temperature to form a fourth composition comprising a modified liquid hydrocarbon product containing sodium sulfide and a reduced amount of said organosulfur species; and (f) extracting a substantial amount of said sodium sulfide from said fourth composition leaving a modified liquid hydrocarbon product; is not taught or fairly suggested in the prior art.

Art Unit: 1764

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
